Surviving the  
Approaching Earth Changes

A Guide for  
Individuals and Communities

By readying yourself with this list you are helping to put climate changes in perspective while the planet cleanses itself. This list, along with your attitude of readiness without fear, will accomplish your survival during these earth change times.

If you are or have been a camper, that experience will help you. In our effort to prepare you for movement and living without fear, we print this survival list for the future.

This survival list will help to begin your thinking for your family, their comfort, warmth and necessities specific to each family. Take precaution of allergies, such as wool, or wheat.

Usually you will be without a supplier for some time, differing with various regions. Be creative! It will help the days go by.

Encampments will be handled with love, caring and good will, one to the other. Food will be carefully planned, cooked and served for nutrition and the good health of all. The maintenance of strength and health at this time cannot be over emphasized.
